Most pages of the Customs Tariff are indicated with "Customs Tariff 2020" in the footer. This is due to a technical problem that could not be solved within the time limit. However, these pages do not include any change compared to the 2020 edition and thus apply unchanged.

INFORMATION

The Norwegian Customs Tariff is based on The Harmonized Commodity Description and Coding System, done at Brussels on 14 June 1983, and its subsequent amending protocols. The Convention (The HS Nomenclature) is approved by The World Customs Organization (WCO) in Brussels. Due to e.g. technological development and changes in international trade, the HS Nomenclature is revised approximately every 5th year. The latest amendment was adopted by the WCO in June 2014 and implemented 1 January 2017. The next revision will be incorporated in the Customs Tariff entering into force 1 January 2022.

The Ministry of Finance has the authority to lay down regulations on new tariff divisions or amend current divisions in the Customs Tariff, cf. the Parliaments decision on customs for the relevant budget term. The authority is further delegated to the Customs. The delegation applies to changes that do not have revenue, business or trade policy effects.

The Customs Tariff is announced as a regulation in "Lovdata". The changes to the divisions in the Customs Tariff take place by amending regulations, and usually apply from 1 January to 31 December.

To the relevant columns in the customs tariff, the following comments apply:

Column 1 - "Import and export regulations"

A description of the content of this column is not yet available in English.

Column 2 - "Number"

A commodity code consists of 8 digits. The first 6 digits are incorporated in the Harmonized System, and are mandatory for all countries using this system as a basis for their customs tariffs. In most cases, the 7th digit reflects national customs duty rates (as bound in WTO). The 8th digit is used to cover e.g. national statistical needs and the interest of the Ministry of Agriculture and Food and the Ministry of Foreign Affairs concerning import and export regulations. In some cases, the 8th digit is also used to specify goods levied with special fees.

Column 3 - "Item"

The text is the commodity descriptions as laid down in the HS-nomenclature for headings and subheadings in the HS. Additionally, texts for national customs purposes and statistical purposes are included.

Column 4 - "Rates"

The rates of Customs duty are stated in percent of the customs value or, if no other basis for the calculation of duty is prescribed, in Norwegian Kroner per kg. If the duty is "free", it is indicated with the digit "0".

The abbreviation "M.N.I" (including immediate packing) is stated in the reference column if the immediate packing is to be considered as part of the dutiable weight..

"Ordinary":

In this column the ordinary rate of Customs duty is indicated. The duty rate applies for goods imported from countries with whom Norway has not entered into a free trade agreement (FTA), and for goods imported from a FTA-party, but not satisfying by the conditions for preferential tariff treatment as set out in these agreements.

The Norwegian Agriculture Authority may stipulate general tariff reductions for agricultural products. This will apply to specific commodity codes for a limited period. All such tariff reductions are published on www.landbruksdirektoratet.no. The customs duty in force at any given time is also available through commodity code lookup on www.toll.no.

The section "Free Trade Agreements"

This section contains duty rates applicable upon import of originating products according to the EFTA-convention, the free trade agreement EU/Norway and the EEA-agreement, or from countries or territories with whom Norway or the EFTA-parties have concluded a free trade agreement. The different customs duties for originating products according to the abovementioned agreements, is stated with the county code in connection to the respective subheading/ commodity code. A Proof of origin shall be presented in such state as required in the respective agreement.

EU (The European Union) consists of the following countries:

- *Austria,*
- *Belgium*
- *Bulgaria*

- *Norway (including Svalbard and Jan Mayen) and*
- *Switzerland*

EEA (the European Economic Agreement) consists of the countries being members of the EU and EFTA, but excluding Switzerland. Also, Svalbard and Jan Mayen are excluded from the EEA-agreement.

For goods originating in Greenland, the most favourable of the Customs duty rates applicable for goods of the same kind originating in EU and/or an EFTA-state shall be used.

The same duty rates as for EEA are applicable upon import of originating products from the Spanish territories Ceuta and Melilla.

Other free trade agreements:

Goods that may be imported free of Customs duty, or to a reduced rate of duty, according to the free trade agreements established between the EFTA-parties with specific countries, or Norway's bilateral agricultural agreements with the same countries, are indicated in connection to the respective subheading/commodity code for the product in question together with the country code (or group of countries), with the applicable duty rate. Such agreements are established with the following countries: Albania (AL), Bosnia-Herzegovina (BA), Canada (CA), Chile (CL), Colombia (CO), Costa Rica (CR), Ecuador (EC), Egypt (EG), The Faroe Islands (FO), Georgia (GE), Great Britain and Northern Ireland (GB), Gulf Cooperation Council* (GCC), Hong Kong, China (HK), Israel (IL), Jordan (JO), Republic of Korea (KR), Lebanon (LB), Macedonia (MK), Montenegro (ME), Morocco (MA), Mexico (MX), Panama (PA), PLO on behalf of the Palestinian Authority (PS), Peru (PE), The Philippines (PH),

* Gulf Cooperation Council (GCC) consists of Bahrain (BH), Kuwait (KW), Oman (OM), Qatar (QA), Saudi-Arabia (SA) and The United Arab Emirates (AE).

FHA is an abbreviation used for all the FTA-partners, including EU, EFTA and the EEA-countries, in Chapters 61, 62 and 63. The code does not cover countries included in the Norwegian GSP system.

"Ordinary" GSP countries are covered by the code GSP, and Lower Middle-Income Countries and Territories with less than 75 million inhabitants by the code G+. Since all products originating in the Least Developed Countries (LDCs) are granted duty-free treatment, this is not especially reflected in the Customs Tariff. Information concerning which countries that belong to the relevant group of countries (GSP or MUL) may be found in separate documents on our website.

Column 5 - "Quantity"

This column indicates the units of quantity used to prepare statistical information.

Column 6 - "References"

This column is used for references to the annex where definitions, information on tariff quotas, tariff reductions and other relevant information is stated. In the electronic version of the customs tariff, this information is available as pop-ups and links.

The Customs Tariff does not contain any information regarding regulations, excise duties or fees.

IMPORT- AND EXPORT REGULATIONS

1. Import regulations in accordance with food, phytosanitary and veterinary legislation (under the Ministry of Agriculture and Food, the Ministry of Health and Care Services and the Ministry of Trade, Industry and Fisheries).

Importers of foodstuffs, products of animal origin, live animals, other breeding material, waste of animal origin, hay and straw, certain plants, food contact materials, feeding materials and other infectious substances are subject to registration. The importer must be registered with the Norwegian Food Safety Authority before the consignment is brought into the country. This applies to imports from all countries

N in front of a heading/commodity code indicates that the product(s) may be subject to prior notification requirements for import to Norway. The person who intend to import has an independent responsibility to familiarize themselves with the regulations (e.g. food, phytosanitary or veterinary) to find out whether the product(s) you want to import is subject to prior notification requirements and/or must be followed by documentation/certificate. It is therefore important to be aware that the marking with **N** is only an indication, and goods that are subject to prior notification requirements may also be classified under headings/commodity codes in the customs tariff where an *N* is not stated.

From The EU/EEA

When importing certain products of animal origin, live animals, other breeding material and waste of animal origin, for which a certificate is required for import from the EEA, notification must be sent to the Norwegian Food Safety Authority in the TRACES system at least 24 hours before the goods arrive.

From third countries

Imports of live animals, food of animal origin and other products of animal origin shall take place at one of the Norwegian Food Safety Authority's veterinary border inspection posts. The shipment (s) must be notified in advance in TRACES at least 24 hours before arrival

Non-animal risk products

Imports of such products shall take place at one of the Norwegian Food Safety Authority's designated import points and be notified via TRACES. Further information on reporting systems and the obligation to register can be found on the Norwegian Food Safety Authority's website.

Import and export control related to commercial and non-commercial trade in endangered plants, plant products, animals or animal products is regulated in CITES - "The Convention on International Trade of Endangered Species", also known as The Washington Convention.

The Norwegian Environment Agency complies with national regulations. All imports and exports of live animals and plants as well as products made from constituents of species in the current species lists are regulated and subject to the control of the Customs.

Original CITES documentation shall be submitted unsolicited to the Customs Service at customs clearance at import and at border crossing at export. All original documents and copies must be dated, stamped and certified by the Customs.

Import and export of CITES-regulated goods without valid CITES documentation is prohibited. This also applies to composite products where CITES-regulated goods are used in production.

All violations of the CITES regulations will be reported. Seized CITES products will be routinely sent to, or administered by, the Norwegian Environment Agency.

For further information, see www.miljødirektoratet/cites.

2. **Export regulations.**

When exporting minke whale meat, an export permit from the Norwegian Environment Agency must be presented to the Customs. The exporter must be registered with the Ministry of Trade, Industry and Fisheries, and the Norwegian Food Safety Authority

NB: There is no marking of goods subject to licensing in the customs tariff.

Export of defence equipment, multi-purpose goods, technology, etc.

Export control means that certain goods, technology and services cannot be exported without an export license issued by the Ministry of Foreign Affairs. This applies to defence material described in List I of the regulations on export of defence material, etc. Furthermore, licensing requirements may also apply to civilian goods, technology and services with potential military use ("dual use") described in List II of the regulations.

The lists can be found in the export regulations.

The Ministry may set conditions for any licenses.

Extended license obligations ("catch-all")

§ 7 of the Export Control Regulations contains a provision which means that under certain conditions there may be a license obligation for any product, technology or service ("catch all").

Pay special attention to the following excerpts from § 7 of the Export Control Regulations:

In addition to lists I and II, exports of the following goods, technology and services are subject to licensing:

- a. any product, technology and service where the exporter is familiar with or has reason to understand that the product, technology or service is or may be intended, in whole or in part, for use in connection with the development, production, handling, operation, maintenance, storage, detection, identification or proliferation of chemical, biological or nuclear weapons or other nuclear explosive devices. Corresponding rules apply to the export of any good, technology or service that can be used for the development, production, maintenance or storage of missiles that can supply such weapons.
- b. any goods, technology or service for military use in areas subject to an arms embargo adopted by the UN Security Council pursuant to Chapter VII of the UN Charter or other action regimes to which Norway has acceded.
- c. any goods, technology and service for military use to areas where there is war, war threatens or to countries where there is civil war.
- d. any product, technology and service that can directly serve to develop a state's military capability in a way that is not compatible with significant Norwegian security and defence interests.

According to the Export Control Regulations § 12, a valid license must be presented to the Customs at the latest upon presentation of the customs declaration.

GENERAL RULES FOR THE INTERPRETATION OF THE HARMONIZED SYSTEM

Classification of goods in the Nomenclature shall be governed by the following principles :

1. The titles of Sections, Chapters and sub-Chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative Section or Chapter Notes and, provided such headings or Notes do not otherwise require, according to the following provisions :
2. a. Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as presented, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also be taken to include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this Rule), presented unassembled or disassembled
b. Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be determined according to the principles of Rule 3.
3. When by application of Rule 2.b or for any other reason, goods are, prima facie, classifiable under two or more headings, classification shall be effected as follows :
 - a. The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
 - b. Mixtures, composite goods consisting of different materials or made up of different components, and goods put up for retail sale, which cannot be classified by reference to 3.a, shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
 - c. When goods cannot be classified by reference to 3.a or 3.b, they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above Rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following Rules shall apply in respect of the goods referred to therein:
 - a. Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and presented with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;
 - b. Subject to the provisions of Rule 5.a above, packing materials and packing containers presented with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to terms of those subheadings and any related Subheading Notes and, mutatis mutandis, to the above Rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this Rule the relative Section and Chapter Notes also apply, unless the context otherwise requires.

SECTION I

LIVE ANIMALS; ANIMAL PRODUCTS

Notes

1. Any reference in this Section to a particular genus or species of an animal, except where the context otherwise requires, includes a reference to the young of that genus or species.
2. Except where the context otherwise requires, throughout the Nomenclature any reference to "dried" products also covers products which have been dehydrated, evaporated or freeze-dried.

CHAPTER 1

CHAPTER 11

PRODUCTS OF THE MILLING INDUSTRY; MALT; STARCHES; INULIN; WHEAT GLUTEN

Notes

1. This Chapter does not cover :
- Roasted malt put up as coffee substitutes (heading 09.01 or 21.01);
 - Prepared flours, groats, meals or starches of heading 19.01;
 - Corn flakes or other products of heading 19.04;
 - Vegetables, prepared or preserved, of heading 20.01, 20.04 or 20.05;
 - Pharmaceutical products (Chapter 30); or
 - Starches having the character of perfumery, cosmetics or toilet preparations (Chapter 33).
2. A. Products from the milling of the cereals listed in the table below fall in this Chapter if they have, by weight on the dry product :
- a starch content (determined by the modified Ewers polarimetric method) exceeding that indicated in Column 2; and
 - an ash content (after deduction of any added minerals) not exceeding that indicated in Column 3.
- Otherwise, they fall in heading 23.02. However, germ of cereals, whole, rolled, flaked or ground, is always classified in heading 11.04.
- B. Products falling in this Chapter under the above provisions shall be classified in heading 11.01 or 11.02 if the percentage passing through a woven metal wire cloth sieve with the aperture indicated in Column 4 or 5 is not less, by weight, than that shown against the cereal concerned.
Otherwise, they fall in heading 11.03 or 11.04.

Cereal	Starch content	Ash content	Rate of passage through a sieve with an aperture of	
			315 micrometres (micron)	500 micrometres (micron)
1	2	3	4	5
Wheat and rye	45 %	2,5 %	80 %	-
Barley	45 %	3 %	80 %	-
Oats	45 %	5 %	80 %	-
Maize (corn) and grain sorghum	45 %	2 %	-	90 %
Rice	45 %	1,6 %	80 %	-
Buckwheat	45 %	4 %	80 %	-

3. For the purpose of heading 11.03, the terms "groats" and "meal" mean products obtained by the fragmentation of cereal grains, of which :
- in the case of maize (corn) products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 2 mm;
 - in the case of other cereal products, at least 95 % by weight passes through a woven metal wire cloth sieve with an aperture of 1.25 mm.

SECTION IV

PREPARED FOODSTUFFS; BEVERAGES, SPIRITS AND VINEGAR; TOBACCO AND
MANUFACTURED TOBACCO SUBSTITUTES**Note.**

1. In this Section, the term "pellets" means products which have been agglomerated either directly by compression or by the addition of a binder in a proportion not exceeding 3 % by weight.

CHAPTER 16

PREPARATIONS OF MEAT, OF FISH OR OF CRUSTACEANS, MOLLUSCS OR OTHER
AQUATIC INVERTEBRATES**Notes.**

1. This Chapter does not cover meat, meat offal, fish, crustaceans, molluscs or other aquatic invertebrates, prepared or preserved by the processes specified in Chapter 2 or 3 or heading 05.04.
2. Food preparations fall in this Chapter provided that they contain more than 20 % by weight of sausage, meat, meat offal, blood, fish or crustaceans, molluscs or other aquatic invertebrates, or any combination thereof. In cases where the preparation contains two or more of the products mentioned above, it is classified in the heading of Chapter 16 corresponding to the component or components which predominate by weight. These provisions do not apply to the stuffed products of heading 19.02 or to the preparations of heading 21.03 or 21.04.

Subheading Notes.

1. For the purposes of subheading 16.02.1000, the expression "homogenised preparations" means preparations of meat, meat offal or blood, finely homogenised, put up for retail sale as food suitable for infants or young children or for dietetic purposes, in containers of a net weight content not exceeding 250 g. For the application of this definition no account is to be taken of small quantities of any ingredients which may have been added to the preparation for seasoning, preservation or other purposes. These preparations may contain a small quantity of visible pieces of meat or meat offal. This subheading takes precedence over all other subheadings of heading 16.02.
2. The fish, crustaceans, molluscs and other aquatic invertebrates specified in the subheadings of heading 16.04 or 16.05 under their common names only, are of the same species as those mentioned in Chapter 3 under the same name.

CHAPTER 17

SUGARS AND SUGAR CONFECTIONERY

Note.

1. This Chapter does not cover :
 - a. Sugar confectionery containing cocoa (heading 18.06);
 - b. Chemically pure sugars (other than sucrose, lactose, maltose, glucose and fructose) or other products of heading 29.40; or
 - c. Medicaments or other products of Chapter 30.

Subheading Notes.

1. For the purpose of subheadings 17.01.1210/1290, 17.01.1310/1390 and 17.01.1410/1490, "raw sugar" means sugar whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of less than 99.5 °
2. Subheadings 17.01.1310 and 17.01.1390 covers only cane sugar obtained without centrifugation, whose content of sucrose by weight, in the dry state, corresponds to a polarimeter reading of 69 ° or more but less than 93 °. The product contains only natural anhydrous microcrystals, of irregular shape, not visible to the naked eye, which are surrounded by residues of molasses and other constituents of sugar cane.

However, the references do not include liquid synthetic polyolefins of which less than 60 % by volume distils at 300 ° C, after conversion to 1,013 millibars when a reduced-pressure distillation method is used (Chapter 39).
3. For the purpose of heading 27.10, "Waste oils" means waste containing mainly petroleum oils and oils obtained from bituminous minerals (as described in Note 2 to this Chapter), whether or not mixed with water. These include :
 - a. Such oils no longer fit for use as primary products (for example, used lubricating oils, used hydraulic oils and used transformer oils);
 - b. Sludge oils from the storage tanks of petroleum oils, mainly containing such oils and a high concentration of

additives (for example, chemicals) used in the manufacture of the primary products; and

- c. Such oils in the form of emulsions in water or mixtures with water, such as those resulting from oil spills, storage tank washing, or from the use of cutting oils for machining operations.

Subheading Notes.

1. For the purposes of subheading 27.01.1100, "anthracite" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) not exceeding 14 %.
2. For the purposes of subheading 27.01.1200, "bituminous coal" means coal having a volatile matter limit (on a dry, mineral-matter-free basis) exceeding 14 % and a calorific value limit (on a moist, mineral-matter-free basis) equal to or greater than 5,833 kcal/kg.
3. For the purposes of subheadings 27.07.1000, 27.07.2000, 27.07.3000 and 27.07.4000 the terms "benzol (benzene)", "toluol (toluene)", "xylol (xylenes)" and "naphthalene" apply to products which contain more than 50 % by weight of benzene, toluene, xylenes or naphthalene, respectively.
4. For the purposes of subheadings 27.10.1211 to 27.10.1299, "light oils and preparations" are those of which 90 % or more by volume (including losses) distil at 210 ° C according to the ISO 3405 method (equivalent to the ASTM D 86 method).
5. For the purposes of the subheadings of heading 27.10, the term "biodiesel" means mono-alkyl esters of fatty acids of a kind used as a fuel, derived from animal or vegetable fats and oils whether or not used.

The term "isotopes", for the purpose of this Note and of the wording of headings 28.44 and 28.45, refers to :
- individual nuclides, excluding, however, those existing in nature in the monoisotopic state;
 - mixtures of isotopes of one and the same element, enriched in one or several of the said isotopes, that is, elements of which the natural isotopic composition has been artificially modified.

8. Chemical elements (for example, silicon and selenium) doped for use in electronics are to be classified in this Chapter, provided that they are in forms unworked as drawn, or in the form of cylinders or rods. When cut in the form of discs, wafers or similar forms, they fall in heading 38.18.

Subheading Note.

1. For the purposes of subheading 28.52.1000, the expression "chemically defined" means all organic or inorganic compounds of mercury meeting the requirements of paragraphs a. to e. of Note 1 to Chapter 28 or paragraphs a. to h. of Note 1 to Chapter 29.

CHAPTER 29

ORGANIC CHEMICALS

Notes.

1. Except where the context otherwise requires, the headings of this Chapter apply only to :
 - a. Separate chemically defined organic compounds, whether or not containing impurities;
 - b. Mixtures of two or more isomers of the same organic compound (whether or not containing impurities), except mixtures of acyclic hydrocarbon isomers (other than stereoisomers), whether or not saturated (Chapter 27);
 - c. The products of headings 29.36 to 29.39 or the sugar ethers, sugar acetals and sugar esters, and their salts, of heading 29.40, or the products of heading 29.41, whether or not chemically defined;
 - d. The products mentioned in a., b. or c. above dissolved in water;
 - e. The products mentioned in a., b. or c. above dissolved in other solvents provided that the solution constitutes a normal and necessary method of putting up these products adopted solely for reasons of safety or for transport and that the solvent does not render the product particularly suitable for specific use rather than for general use;
 - f. The products mentioned in a., b., c., d. or e. above with an added stabiliser (including an anti-caking agent) necessary for their preservation or transport;
 - g. The products mentioned in a., b., c., d. or e. above with an added anti-dusting agent or a colouring or odoriferous substance added to facilitate their identification or for safety reasons, provided that the additions do not render the product particularly suitable for specific use rather than for general use;
 - h. The following products, diluted to standard strengths, for the production of azo dyes : diazonium salts, couplers used for these salts and diazotisable amines and their salts.
2. This Chapter does not cover :
 - a. Goods of heading 15.04 or crude glycerol of heading 15.20;
 - b. Ethyl alcohol (heading 22.07 or 22.08);

 1. Inorganic salts of organic compounds such as acid-, phenol- or enol-function compounds or organic bases, of sub-Chapter I to X or heading 29.42 are to be classified in the heading appropriate to the organic compound;
 2. Salts formed between organic compounds of sub-Chapters I to X or heading 29.42 are to be classified in the heading appropriate to the base or to the acid (including phenol- or enol-function compounds) from which they are formed, whichever occurs last in numerical order in the Chapter; and
 3. Co-ordination compounds, other than products classifiable in sub-Chapter XI or heading 29.41, are to be classified in the heading which occurs last in numerical order in Chapter 29, among those appropriate to the fragments formed by "cleaving" of all metal bonds, other than metal-carbon bonds.
- D. Metal alcoholates are to be classified in the same heading as the corresponding alcohols except in the case of ethanol (heading 29.05).
- E. Halides of carboxylic acids are to be classified in the same heading as the corresponding acids.
6. The compounds of headings 29.30 and 29.31 are organic compounds the molecules of which contain, in addition to atoms of hydrogen, oxygen or nitrogen, atoms of other non-metals or of metals (such as sulphur, arsenic or lead) directly linked to carbon atoms.
 Heading 29.30 (organo-sulphur compounds) and heading 29.31 (other organo-inorganic compounds) do not include sulphonated or halogenated derivatives (including compound derivatives) which, apart from hydrogen, oxygen and nitrogen, only have directly linked to carbon the atoms of sulphur or of a halogen which give them their nature of

- sulphonated or halogenated derivatives (or compound derivatives).
7. Headings 29.32, 29.33 and 29.34 do not include epoxides with a three-membered ring, ketone peroxides, cyclic polymers of aldehydes or of thioaldehydes, anhydrides of polybasic carboxylic acids, cyclic esters of polyhydric alcohols or phenols with polybasic acids, or imides of polybasic acids.

These provisions apply only when the ring-position heteroatoms are those resulting solely from the cyclising function or functions here listed.

8. For the purposes of heading 29.37 :
- a. the term "hormones" includes hormone-releasing or hormone-stimulating factors, hormone inhibitors and hormone antagonists (anti-hormones);

- b. The expression "used primarily as hormones" applies not only to hormone derivatives and structural analogues used primarily for their hormonal effect, but also to those derivatives and structural analogues used primarily as intermediates in the synthesis of products of this heading.

Subheading Notes.

1. Within any one heading of this Chapter, derivatives of a chemical compound (or group of chemical compounds) are to be classified in the same subheading as that compound (or group of compounds) provided that they are not more specifically covered by any other subheading and that there is no residual subheading named "Other" in the series of subheadings concerned.
2. Note 3 to Chapter 29 does not apply to the subheadings of this Chapter.

2. A. For the purpose of heading 38.22, the expression "certified reference materials" means reference materials which are accompanied by a certificate which indicates the values of the certified properties, the methods used to determine these values and the degree of certainty associated with each value and which are suitable for analytical, calibrating or referencing purposes.
B. With the exception of the products of Chapter 28 or 29, for the classification of certified reference materials, heading 38.22 shall take precedence over any other heading in the Nomenclature.
3. Heading 38.24 includes the following goods which are not to be classified in any other heading of the Nomenclature :

4. Throughout the Nomenclature, "municipal waste" means waste of a kind collected from households, hotels, restaurants, hospitals, shops, offices, etc., road and pavement sweepings, as well as construction and demolition waste. Municipal waste generally contains a large variety of materials such as plastics, rubber, wood, paper, textiles, glass, metals, food materials, broken furniture and other damaged or discarded articles. The term "municipal waste", however, does not cover:
 - a. Individual materials or articles segregated from the waste, such as wastes of plastics, rubber, wood, paper, textiles, glass or metals and spent batteries which fall in their appropriate headings of the Nomenclature;
 - b. Industrial waste;
 - c. Waste pharmaceuticals, as defined in Note 4.k to Chapter 30; or
 - d. Clinical waste, as defined in Note 6.a below.
5. For the purposes of heading 38.25, "sewage sludge" means sludge arising from urban effluent treatment plant and includes pre-treatment waste, scourings and unstabilised sludge. Stabilised sludge when suitable for use as fertiliser is excluded (heading 31).
6. For the purposes of heading 38.25, the expression "other wastes" applies to :
 - a. Clinical waste, that is, contaminated waste arising from medical research, diagnosis, treatment or other medical, surgical, dental or veterinary procedures, which often contain pathogens and pharmaceutical substances and require special disposal procedures (for example, soiled dressings, used gloves and used syringes);
 - b. Waste organic solvents;
 - c. Wastes of metal pickling liquors, hydraulic fluids, brake fluids and anti-freezing fluids; and

SECTION VII

PLASTICS AND ARTICLES THEREOF; RUBBER AND ARTICLES THEREOF

Notes.

1. Goods put up in sets consisting of two or more separate constituents, some or all of which fall in this Section and are intended to be mixed together to obtain a product of Section VI or VII, are to be classified in the heading appropriate to that product, provided that the constituents are :
 - a. having regard to the manner in which they are put up, clearly identifiable as being intended to be used together without first being repacked;
 - b. presented together; and
 - c. identifiable, whether by their nature or by the relative proportions in which they are present, as being complementary one to another.
2. Except for the goods of heading 39.18 or 39.19, plastics, rubber, and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the product, fall in Chapter 49.

CHAPTER 39

PLASTICS AND ARTICLES THEREOF

Notes

1. Throughout the Nomenclature the expression "plastics" means those materials of headings 39.01 to 39.14 which are or have been capable, either at the moment of polymerisation or at some subsequent stage, of being formed under external influence (usually heat and pressure, if necessary with a solvent or plasticiser) by moulding, casting, extruding, rolling or other process into shapes which are retained on the removal of the external influence.
Throughout the Nomenclature any reference to "plastics" also includes vulcanised fibre. The expression, however, does not apply to materials regarded as textile materials of Section XI.
2. This Chapter does not cover :
 - a. Lubricating preparations of heading 27.10 or 34.03;
 - b. Waxes of heading 27.12 or 34.04;
 - c. Separate chemically defined organic compounds (Chapter 29);
 - d. Heparin or its salts (heading 30.01);
 - e. Solutions (other than collodions) consisting of any of the products specified in headings 39.01 to 39.13 in volatile organic solvents when the weight of the solvent exceeds 50 % of the weight of the solution (heading 32.08); stamping foils of heading 32.12;
 - f. Organic surface-active agents or preparations of heading 34.02;

 - e. Resols (heading 39.09) and other prepolymers.
4. The expression "copolymers" covers all polymers in which no single monomer unit contributes 95 % or more by weight to the total polymer content.
For the purposes of this Chapter, except where the context otherwise requires, copolymers (including copolycondensates, co-polyaddition products, block copolymers and graft copolymers) and polymer blends are to be classified in the heading covering polymers of that comonomer unit which predominates by weight over every other single comonomer unit. For the purposes of this Note,

constituent comonomer units of polymers falling in the same heading shall be taken together.

If no single comonomer unit predominates, copolymers or polymer blends, as the case may be, are to be classified in the heading which occurs last in numerical order among those which equally merit consideration.

5. Chemically modified polymers, that is those on which only appendages to the main polymer chain have been changes by chemical reaction, are to be classified in the heading appropriate to the unmodified polymer. This provision does not apply to graft copolymers.
6. In headings 39.01 to 39.14, the expression "primary forms" applies only to the following forms :
 - a. Liquids and pastes, including dispersions (emulsions and suspensions) and solutions;
 - b. Blocks or irregular shape, lumps, powders (including moulding powders), granules, flakes and similar bulk forms.
7. Heading 39.15 does not apply to waste, parings and scrap of a single thermoplastic material, transformed into primary forms (headings 39.01 to 39.14).
8. For the purposes of heading 39.17, the expression "tubes, pipes and hoses" means hollow products, whether semi-manufactures or finished products, of a kind generally used for conveying, conducting or distributing gases or liquids (for example, ribbed garden hose, perforated tubes). This expression also includes sausage casings and other lay-flat tubing. However, except for the last-mentioned, those having an internal cross-section other than round, oval, rectangular (in which the length does not exceed 1.5 times the width) or in the shape of a regular polygon are not to be regarded as tubes, pipes and hoses but as profile shapes.
9. For the purposes of heading 39.18, the expression "wall or ceiling coverings of plastics" applies to products in rolls, of a width not less than 45 cm, suitable for wall or ceiling decoration, consisting of plastics fixed permanently on a backing of any material other than paper, the layer of plastics (on the face side) being grained, embossed, coloured, design-printed or otherwise decorated.
10. In headings 39.20 and 39.21, the expression "plates, sheets, film, foil and strip" applies only to plates, sheets, film, foil and strip (other than those of Chapter 54) and to blocks of regular geometric shape, whether or not printed or otherwise surface-worked, uncut or cut into rectangles (including squares) but not further worked (even if when so cut they become articles ready for use).
11. Heading 39.25 applies only to the following articles, not being products covered by any of the earlier headings of sub-Chapter II :
 - a. Reservoirs, tanks (including septic tanks), vats and similar containers, of a capacity exceeding 300 l;
 - b. Structural elements used, for example, in floors, walls or partitions, ceilings or roofs;
 - c. Gutters and fittings therefor;
 - d. Doors, windows and their frames and thresholds for doors;
 - e. Balconies, balustrades, fencing, gates and similar barriers;
 - f. Shutters, blinds (including Venetian blinds) and similar articles and parts and fittings thereof;
 - g. Large-scale shelving for assembly and permanent installation, for example, in shops, workshops, warehouses;
 - h. Ornamental architectural features, for example, flutings, cupolas, dovecotes; and

- ij. Fittings and mountings intended for permanent installation in or on doors, windows, staircases, walls or other parts of buildings, for example, knobs, handles, hooks, brackets, towel rails, switch-plates and other protective plates.

Subheading notes.

1. Within any one heading of this Chapter, polymers (including copolymers) and chemically modified polymers are to be classified according to the following provisions :
 - a. Where there is a subheading named "Other" in the same series :
 1. The designation in a subheading of a polymer by the prefix "poly" (for example, polyethylene and polyamide-6,6) means that the constituent monomer unit or monomer units of the named polymer taken together must contribute 95 % or more by weight of the total polymer content.
 2. The copolymers named in subheadings 39.01.3000, 39.01.4000, 39.03.2000, 39.03.3000 and 39.04.3000 are to be classified in those subheadings, provided that the comonomer units of the named copolymers contribute 95 % or more by weight of the total polymer content.
 3. Chemically modified polymers are to be classified in the subheading named "Other", provided that the chemically modified polymers are not more specifically covered by another subheading.
 4. Polymers not meeting 1., 2. or 3. above, are to be classified in the subheading, among the remaining subheadings in the series, covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the series of subheadings under consideration are to be compared.
 - b. Where there is no subheading named "Other" in the same series :
 1. Polymers are to be classified in the subheading covering polymers of that monomer unit which predominates by weight over every other single comonomer unit. For this purpose, constituent monomer units of polymers falling in the same subheading shall be taken together. Only the constituent comonomer units of the polymers in the same series under consideration are to be compared.
 2. Chemically modified polymers are to be classified in the subheading appropriate to the unmodified polymer. Polymer blends are to be classified in the same subheading as polymers of the same monomer units in the same proportions.
2. For the purpose of subheading 39.20.4300, the term "plasticisers" includes secondary plasticisers.

CHAPTER 40

RUBBER AND ARTICLES THEREOF

Notes.

1. Except where the context otherwise requires, throughout the Nomenclature the expression "rubber" means the following products, whether or not vulcanised or hard : natural rubber, balata, gutta-percha, guayule, chicle and similar natural gums, synthetic rubber, factice derived from oils, and such substances reclaimed.
2. This Chapter does not cover :
 - a. Goods of Section XI (textiles and textile articles);
 - b. Footwear or parts thereof of Chapter 64;
 - c. Headgear or parts thereof (including bathing caps) of Chapter 65;
 - d. Mechanical or electrical appliances or parts thereof of Section XVI (including electrical goods of all kinds), of hard rubber;
 - e. Articles of Chapter 90, 92, 94 or 96; or
 - f. Articles of Chapter 95 (other than sports gloves, mittens and mitts and articles of headings 40.11 to 40.13).
3. In headings 40.01 to 40.03 and 40.05, the expression "primary forms" applies only to the following forms :
 - a. Liquids and pastes (including latex, whether or not pre-vulcanised, and other dispersions and solutions);
 - b. Blocks of irregular shape, lumps, bales, powders, granules, crumbs and similar bulk forms.
4. In note 1 to this Chapter and in heading 40.02, the expression "synthetic rubber" applies to :
 - a. Unsaturated synthetic substances which can be irreversibly transformed by vulcanisation with sulphur into non-thermoplastic substances which, at a temperature between 18 °C and 29 °C, will not break on being extended to three times their original length and will return, after being extended to twice their original length, within a period of five minutes, to a length not greater than one and a half times their original length. For the purposes of this test, substances necessary for the cross-linking, such as vulcanising activators or accelerators, may be added; the presence of substances as provided for by Note 5.B.2. and 5.B3. is also permitted. However, the presence of any substances not necessary for the cross-linking, such as extenders, plasticisers and fillers, is not permitted.
 - b. Thioplasts (TM); and
 - c. Natural rubber modified by grafting or mixing with plastics, depolymerised natural rubber, mixtures of unsaturated synthetic substances with saturated synthetic high polymers provided that all the above-mentioned products comply with the requirements concerning vulcanisation, elongation and recovery in a. above.
5. A. Headings 40.01 and 40.02 do not apply to any rubber or mixture of rubbers which has been compounded, before or after coagulation, with :
 1. vulcanising agents, accelerators, retarders or activators (other than those added for the preparation of pre-vulcanised rubber latex);
 2. pigments or other colouring matter, other than those added solely for the purpose of identification;
 3. plasticisers or extenders (except mineral oil in the case of oil-extended rubber), fillers, reinforcing agents, organic solvents or any other substances, except those permitted under B.;
 B. The presence of the following substances in any rubber or mixture of rubbers shall not affect its classification in heading 40.01 or 40.02, as the case may be, provided that such rubber or mixture of rubbers retains its essential character as a raw material :
 1. emulsifiers or anti-tack agents;
 2. small amounts of breakdown products of emulsifiers;
 3. very small amounts of the following : heat-sensitive agents (generally for obtaining thermosensitive rubber latexes), cationic surface-agents (generally for obtaining electro-positive rubber latexes), antioxidants, coagulants, crumbling agents, freeze-resisting agents, peptisers, preservatives, stabilisers, viscosity-control agents, or similar special-purpose additives.
6. For the purpose of heading 40.04, the expression "waste, parings and scrap" means rubber waste, parings and scrap from the manufacture or working of rubber and rubber goods definitely not usable as such because of cutting-up, wear or other reasons.
7. Thread wholly of vulcanised rubber, of which any cross-sectional dimension exceeds 5 mm, is to be classified as strip, rods or profile shapes, of heading 40.08.
8. Heading 40.10 includes conveyor or transmission belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber.
9. In headings 40.01, 40.02, 40.03, 40.05 and 40.08, the expression "plates", "sheets" and "strip" apply only to plates, sheets and strip and to blocks of regular geometric shape, uncut or simply cut to rectangular (including square) shape, whether or not having the character of articles and whether or not printed or otherwise surface-worked, but not otherwise cut to shape or further worked.

In heading 40.08, the expressions "rods" and "profile shapes" apply only to such products, whether or not cut to length or surface-worked but not otherwise worked.

Except where heading 48.03 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibres which have been otherwise processed.
4. In this Chapter the expression "newsprint" means uncoated paper of a kind used for the printing of newspapers, of which not less than 50 % by weight of the total fibre content consists of wood fibres obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometres (microns), weighing not less than 40 g/m² and not more than 65 g/m², and applies only to paper : a. in strips or rolls with a width exceeding 28 cm; or b. in rectangular (including square) sheets with one side exceeding 28 cm and the other side exceeding 15 cm in the unfolded state.

Heading 48.02 does not, however, cover filter paper or paperboard (including tea-bag paper) or felt paper or paperboard.
6. In this Chapter "kraft paper and paperboard" means paper and paperboard of which not less than 80 % by weight of the total fibre content consists of fibres obtained by the chemical sulphate or soda processes.
7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibres answering to a description in two or more of the headings 48.01 to 48.11 are to be classified under that one of such headings which occurs last in numerical order in the Nomenclature.
8. Headings 48.03 to 48.09 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibres:
 - a. in strips or rolls of a width exceeding 36 cm; or
 - b. in rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.
9. For the purposes of heading 48.14, the expression "wallpaper and similar wall coverings" applies only to :
 - a. Paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration :

10. Heading 48.20 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.
 11. Heading 48.23 applies, *inter alia*, to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.
 12. Except for the goods of heading 48.14 or 48.21, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in Chapter 49.

Multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters : 53 cN/tex

Single, multiple (folded) or cabled yarn of viscose rayon : 27 cN/tex
 7. For the purposes of this Section, the expression "made up" means :
 - a. Cut otherwise than into squares or rectangles;
 - b. Produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, table cloths, scarf squares, blankets);

 - d. Hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unravelling by whipping or by other simple means;
 - e. Cut to size and having undergone a process of drawn thread work;
 - f. Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textile assembled in layers, whether or not padded);
 - g. Knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.
8. For the purpose of Chapters 50 to 60 :
 - a. Chapters 50 to 55 and 60 and, except where the context otherwise requires, Chapters 56 to 59 do not apply to goods made up within the meaning of Note 7 above; and
 - b. Chapters 50 to 55 and 60 do not apply to goods of Chapters 56 to 59.
 9. The woven fabrics of Chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.
 10. Elastic products consisting of textile materials combined with rubber threads are classified in this Section.
 11. For the purposes of this Section, the expression "impregnated" includes "dipped".
 12. For the purposes of this Section, the expression "polyamides" includes "aramids".
 13. For the purposes of this Section and, where applicable, throughout the Nomenclature, the expression "elastomeric yarn" means filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.
 14. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale. For the purposes of this Note, the expression "textile garments" means garments of headings 61.01 to 61.14 and headings 62.01 to 62.11.
- Subheading Notes.**
1. In this Section and, where applicable, throughout the Nomenclature, the following expression have the meanings hereby assigned to them :
 - a. **Unbleached yarn**
Yarn which :
 1. has the natural colour of its constituent fibres and has not been bleached, dyed (whether or not in the mass) or printed; or
 2. is of indeterminate colour ("grey yarn"), manufactured from garnetted stock.
 Such yarn may have been treated with a colourless dressing or fugitive dye (which disappears after simple

washing with soap) and, in the case of man-made fibres, treated in the mass with delustring agents (for example, titanium dioxide).

b. **Bleached yarn**

Yarn which :

1. has undergone a bleaching process, is made of bleached fibres or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;
2. consisting of a mixture of unbleached and bleached fibres; or
3. is multiple (folded) or cabled and consists of unbleached and bleached yarns.

c. **Coloured (dyed or printed) yarn**

Yarn which :

1. is dyed (whether or not in the mass) other than white or in a fugitive colour, or printed, or made from dyed or printed fibres;
2. consist of a mixture of dyed fibres of different colours or of a mixture of unbleached or bleached fibres with coloured fibres (marl of mixture yarns), or is printed in one or more colours at intervals to give the impression of dots;
3. is obtained from slivers or rovings which have been printed; or
4. is multiple (folded) or cabled and consists of unbleached or bleached yarn and coloured yarn.

The above definitions also apply, *mutatis mutandis*, to monofilament and to strip or the like of Chapter 54.

d. **Unbleached woven fabric**

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colourless dressing or a fugitive dye.

e. **Bleached woven fabric**

Woven fabric which :

1. has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;
2. consists of bleached yarn; or
3. consists of unbleached and bleached yarn.

f. **Dyed woven fabric**

Woven fabric which :

1. is dyed a single uniform colour other than white (unless the context otherwise requires) or has been treated with a coloured finish other than white

(unless the context otherwise requires), in the piece; or

2. consists of coloured yarn of a single uniform colour.

g. **Woven fabric of yarns of different colours**

Woven fabric (other than printed woven fabric) which :

- 1.i consists of yarns of different colours or yarns of different shades of the same colour (other than the natural colour of the constituent fibres);
2. consists of unbleached or bleached yarn and coloured yarn; or
3. consists of marl or mixture yarns.

(In all cases, the yarn used in selvages and piece ends is not taken into consideration).

h. **Printed woven fabric**

Woven fabric which has been printed in the piece, whether or not made from yarns of different colours.

(The following are also regarded as printed woven fabrics : woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The process of mercerisation does not affect the classification of yarns or fabrics within the above categories.

The definitions at d. to h. above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

ij. **Plain weave**

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

2. A. Products of Chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under Note 2 to this Section for the classification of a product of Chapters 50 to 55 or of heading 58.09 consisting of the same textile materials.

B. For the application of this rule :

- a. where appropriate, only the part which determines the classification under Interpretative Rule 3 shall be taken into account;
- b. in the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;
- c. in the case of embroidery of heading 58.10 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

CHAPTER 54

MAN-MADE FILAMENTS; STRIP AND THE LIKE OF MAN-MADE TEXTILE MATERIALS

Notes.

1. Throughout the Nomenclature, the term "man-made fibres" means staple fibres and filaments of organic polymers produced by manufacturing processes, either :
 - a. By polymerisation of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification of polymers produced by this process (for example, poly(vinyl alcohol) prepared by the hydrolysis of poly(vinyl acetate)); or
 - b. By dissolution or chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon (cupro) or viscose rayon, or

by chemical modification of natural organic polymers (for example, cellulose, casein and other proteins, or alginic acid), to produce polymers such as cellulose acetate or alginates.

The terms "synthetic" and "artificial", used in relation to fibres, mean : synthetic : fibres as defined at a.; artificial : fibres as defined at b. Strip and the like of heading 54.04 or 54.05 are not considered to be man-made fibres.

The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Headings 54.02 and 54.03 do not apply to synthetic or artificial filament tow of Chapter 55.

CHAPTER 55

MAN-MADE STAPLE FIBRES

Notes.

- 1. Headings 55.01 and 55.02 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications :
 - a. Length of tow exceeding 2 m;
 - b. Twist less than 5 turns per metre;
 - c. Measuring per filament less than 67 decitex;

- d. Synthetic filament tow only : the tow must be drawn, that is to say, be incapable of being stretched by more than 100 % of its length;
- e. Total measurement of tow more than 20,000 decitex. Tow of a length not exceeding 2 m is to be classified in heading 55.03 or 55.04.

Notes.

1. This Chapter does not cover :
 - a. Wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of Chapter 33, soaps or detergents of heading 34.01, polishes, creams or similar preparations of heading 34.05, fabric softeners of heading 38.09) where the textile material is present merely as a carrying medium;
 - b. Textile products of heading 58.11;
 - c. Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 68.05);
 - d. Agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 68.14);
 - e. Metal foil on a backing of felt or nonwovens (generally Section XIV or XV); or
 - f. Sanitary towels (pads) and tampons, napkins and napkin liners for babies and similar articles of heading 96.19.
2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibres the cohesion of which has been enhanced by a stitch-bonding process using fibres from the web itself.
3. Headings 56.02 and 56.03 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).
 Heading 56.03 also includes nonwovens in which plastics or rubber forms the bonding substances.
 Headings 56.02 and 56.03 do not, however, cover :
 - a. Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 % or less by weight of textile material or felt completely embedded in plastics or rubber (Chapter 39 or 40);
 - b. Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39 or 40); or
 - c. Plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (Chapter 39 or 40).
4. Heading 56.04 does not cover textile yarn, or strip or the like of heading 54.04 or 54.05, in which the impregnation, coating or covering cannot be seen with the naked eye (usually Chapters 50 to 55); for the purpose of this provision, no account should be taken of any resulting change of colour.

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS; TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

Notes.

1. Except where the context otherwise requires, for the purposes of this Chapter the expression "textile fabrics" applies only to the woven fabrics of Chapters 50 to 55 and headings 58.03 and 58.06, the braids and ornamental trimmings in the piece of heading 58.08 and the knitted or crocheted fabrics of headings 60.02 to 60.06.

 2. Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15 °C and 30 °C (usually Chapter 39);
 3. Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of colour (Chapter 39);
 4. Fabrics partially coated or partially covered with plastics and bearing designs from these treatments (usually Chapters 50 to 55, 58 or 60);

CHAPTER 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED

Notes.

1. This Chapter applies only to made up knitted or crocheted articles.
2. This Chapter does not cover :
 - a. Goods of heading 62.12;
 - b. Worn clothing or other worn articles of heading 63.09; or
 - c. Orthopaedic appliances, surgical belts, trusses or the like (heading 90.21).

3. For the purposes of headings 61.03 and 61.04 :
 - a. The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising :
 - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
 - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions :

- morning dress comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

- b. The term "ensemble" means a set of garments (other than suits and articles of heading 61.07, 61.08 or 61.09) composed of several pieces made up in identical fabric, put up for retail sale, and comprising :
 - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

- one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski suits, of heading 61.12.

4. Headings 61.05 and 61.06 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimetre in each direction counted on an area measuring at least 10 cm x 10 cm. Heading 61.05 does not cover sleeveless garments.
5. Heading 61.09 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.
6. For the purposes of heading 61.11 :
 - a. The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm;
 - b. Articles which are, *prima facie*, classifiable both in heading 61.11 and in other headings of this Chapter are to be classified in heading 61.11.
7. For the purposes of heading 61.12, "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of :
 - a. a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
 - b. a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising :
 - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.

The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph a. above and a type of padded, sleeveless jacket worn over the overall.

All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.
8. Garments which are, *prima facie*, classifiable both in heading 61.13 and in other headings of this Chapter, excluding heading 61.11, are to be classified in heading 61.13.
9. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the heading covering women's or girls' garments.

10. Articles of this Chapter may be made of metal thread.

CHAPTER 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED

Notes.

1. This Chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 62.12).
2. This Chapter does not cover :
 - a. Worn clothing or other worn articles of heading 63.09; or
 - b. Orthopaedic appliances, surgical belts, trusses or the like (heading 90.21).
3. For the purposes of headings 62.03 and 62.04 :
 - a. The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising :

- one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and
- one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

All of the components of a "suit" must be of the same fabric construction, colour and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

The term "suit" includes the following sets of garments, whether or not they fulfil all the above conditions :

- morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;
- evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;
- dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

- b. The term "ensemble" means a set of garments (other than suits and articles of heading 62.07 or 62.08) composed of several pieces made up in identical fabric, put up for retail sale, and comprising :
 - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and
 - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib

and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

All of the components of an ensemble must be of the same fabric construction, style, colour and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits and ski suits, of heading 62.11.

4. For the purposes of heading 62.09 :
 - a. The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 cm;
 - b. Articles which are, *prima facie*, classifiable both in heading 62.09 and in other headings of this Chapter are to be classified in heading 62.09.
 5. Garments which are, *prima facie*, classifiable both in heading 62.10 and in other headings of this Chapter, excluding heading 62.09, are to be classified in heading 62.10.
 6. For the purposes of heading 62.11, the term "ski suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of :
 - a. a "ski overall", that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or
 - b. a "ski ensemble", that is, a set of garments composed of two or three pieces, put up for retail sale and comprising :
 - one garment such as an anorak, wind-cheater, wind-jacket or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and
 - one pair of trousers whether or not extending above waist-level, one pair of breeches or one bib and brace overall.
- The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph a. above and a type of padded, sleeveless jacket worn over the overall.
- All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same colour; they also must be of corresponding or compatible size.
7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 cm, are to be classified as handkerchiefs (heading 62.13). Handkerchiefs of which any side exceeds 60 cm are to be classified in heading 62.14.
 8. Garments of this Chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or the other of the sexes.

Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.
 9. Articles of this Chapter may be made of metal thread.

 - b. cutting to shape does not affect the classification of glass in sheets;
 - c. the expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infrared light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.
3. The products referred to in heading 70.06 remain classified in that heading whether or not they have the character of articles.
4. For the purposes of heading 70.19, the expression "glass wool" means :
 - a. Mineral wools with a silica (SiO₂) content not less than 60 % by weight;
 - b. Mineral wools with a silica (SiO₂) content less than 60 % but with an alkaline oxide (K₂O or Na₂O) content exceeding 5 % by weight or a boric oxide (B₂O₃) content exceeding 2 % by weight.
 Mineral wools which do not comply with the above specifications fall in heading 68.06.

2. For the classification of ferro-alloys in the subheadings of heading 72.02 the following rule should be observed :
A ferro-alloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in Chapter Note 1.c; by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.
For the application of this rule the unspecified "other elements" referred to in Chapter Note 1.c must each exceed 10 % by weight.

CHAPTER 73

ARTICLES OF IRON OR STEEL

Notes.

1. In this Chapter, the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with

the chemical composition of steel as defined in Note 1.d to Chapter 72.

2. In this Chapter the word "wire" means hot or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

CHAPTER 74

COPPER AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them :

a. **Refined copper**

Metal containing at least 99.85 % by weight of copper; or Metal containing at least 97.5 % by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table :

TABLE - Other elements

Element	Limiting content % by weight
Ag Silver	0.25
As Arsenic	0.5
Cd Cadmium	1.3
Cr Chromium	1.4
Mg Magnesium	0.8
Pb Lead	1.5
S Sulphur	0.7
Sn Tin	0.8
Te Tellurium	0.8
Zn Zinc	1
Zr Zirconium	0.3
Other elements*, each	0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

b. **Copper alloys**

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that :

1. the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or
2. the total content by weight of such other elements exceeds 2.5 %.

c. **Master alloys**

Alloys containing with other elements more than 10 % by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as de-oxidants, de-sulphurising agents or for similar uses in the metallurgy of non-ferrous metals. However, copper phosphide (phosphor copper) containing more than 15 % by weight of phosphorus falls in heading 28.53.

d. **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire-bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire-rod) or tubes, are however to be taken to be unwrought copper of heading 74.03.

e. **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

f. **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

g. **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading 74.03), coiled or not, of solid rectangular (other than square) cross-section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are :

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 74.09 and 74.10 apply, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

h. **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness.

Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them :

a. **Copper-zinc base alloys (brasses)**

Alloys of copper and zinc, with or without other elements. When other elements are present :

- zinc predominates by weight over each of such other elements;

- any nickel content by weight is less than 5 % (see copper-nickel-zinc alloys (nickel silvers)); and
- any tin content by weight is less than 3 % (see copper-tin-alloys (bronzes)).

b. **Copper-tin base alloys (bronzes)**

Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 % or more the zinc content by weight may exceed that of tin but must be less than 10 %.

c. **Copper-nickel-zinc base alloys (nickel silvers)**

Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 % or more by weight (see copper-zinc alloys (brasses)).

d. **Copper-nickel base alloys**

Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 % of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

CHAPTER 75

NICKEL AND ARTICLES THEREOF

Note.

1. In this Chapter the following expressions have the meaning hereby assigned to them :

a. **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

b. **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

c. **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

d. **Plates, sheets, strip and foil**

Flat-surfaced products (other than the unwrought products of heading 75.02), coiled or not, of solid rectangular (other than square) cross-section with or without corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are :

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,
- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 75.06 applies, *inter alia*, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, chequers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

e. **Tubes and pipes**

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular, or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

1. the cobalt content by weight does not exceed 1.5 %, and
2. the content by weight of any other element does not exceed the limit specified in the following table :

TABLE - Other elements

Element	Limiting content % by weight
Fe Iron	0.5
O Oxygen	0.4
Other elements, each	0.3

Metallic substances in which nickel predominates by weight over each of the other elements provided that :

1. the content by weight of cobalt exceeds 1.5%,
2. the content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or
3. the total content by weight of elements other than nickel plus cobalt exceeds 1 %.

2. Notwithstanding the provisions of Chapter Note 1.c, for the purposes of subheading 75.08.1000 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Note.

1. In this Chapter the following expressions have the meanings hereby assigned to them :

a. **Bars and rods**

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or de-scaling), provided that they have not thereby assumed the character of articles or products of other headings.

b. **Profiles**

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross-section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

c. **Wire**

Rolled, extruded or drawn products, in coils, which have a uniform solid cross-section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross-section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross-section exceeds one-tenth of the width.

Hollow products, coiled or not, which have a uniform cross-section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross-section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross-sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross-sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

9. A. Notes 9.a and 9.b to Chapter 85 also apply with respect to the expressions "semiconductor devices" and "electronic integrated circuits", respectively, as used in this Note and in heading 84.86. However, for the purposes of this Note and of heading 84.86, the expression "semiconductor devices" also covers photosensitive semiconductor devices and light emitting diodes (LED).
- B. For the purposes of this Note and of heading 84.86, the expression "manufacture of flat panel displays" covers the fabrication of substrates into a flat panel. It does not cover

the manufacture of glass or the assembly of printed circuit boards or other electronic components onto the flat panel. The expression "flat panel display" does not cover cathode-ray tube technology.

- C. Heading 84.86 also includes machines and apparatus solely or principally of a kind used for :
1. the manufacture or repair of masks and reticles;
 2. assembling semiconductor devices or electronic integrated circuits;
 3. lifting, handling, loading or unloading of boules, wafers, semiconductor devices, electronic integrated circuits and flat panel displays.
- D. Subject to Note 1 to Section XVI and Note 1 to Chapter 84, machines and apparatus answering to the description in heading 84.86 are to be classified in that heading and in no other heading of the Nomenclature.

Subheading Notes.

1. For the purposes of subheading 84.65.2000, the term "machining centres" applies only to machine-tools for working wood, cork, bone, hard rubber, hard plastics or similar hard materials, which can carry out different types of machining operations by automatic tool change from a magazine or the like in conformity with a machining programme.
2. For the purposes of subheading 84.71.4900, the term "systems" means automatic data processing machines whose units satisfy the conditions laid down in Note 5.C to Chapter 84 and which comprise at least a central processing unit, one input unit (for example, a keyboard or a scanner), and one output unit (for example, a visual display unit or a printer).
3. For the purposes of subheading 84.81.2000, the expression "valves for oleohydraulic or pneumatic transmissions" means valves which are used specifically in the transmission of "fluid power" in a hydraulic or pneumatic system, where the energy source is supplied in the form of pressurised fluids (liquid or gas). These valves may be of any type (for example, pressure-reducing type, check type). Subheading 84.81.2000 takes precedence over all other subheadings of heading 84.81.
4. Subheading 84.82.4000 applies only to bearings with cylindrical rollers of a uniform diameter not exceeding 5 mm and having a length which is at least three times the diameter. The ends of the rollers may be rounded.

 - d. Vacuum apparatus of a kind used in medical, surgical, dental veterinary sciences (heading 90.18); or
 - e. Electrically heated furniture of Chapter 94.
2. Headings 85.01 to 85.04 do not apply to goods described in heading 85.11, 85.12, 85.40, 85.41 or 85.42.
However, metal tank mercury arc rectifiers remain classified in heading 85.04.
3. For the purposes of heading 85.07, the expression "electric accumulators" includes those presented with ancillary components which contribute to the accumulator's function of storing and supplying energy or protect it from damage, such as electrical connectors, temperature control devices (for example, thermistors) and circuit protection devices. They may also include a portion of the protective housing of the goods in which they are to be used.
4. Heading 85.09 covers only the following electro-mechanical machines of the kind commonly used for domestic purposes :
 - a. Floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;
 - b. Other machines provided the weight of such machines does not exceed 20 kg.

The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 84.14), centrifugal clothes-dryers (heading 84.21), dish washing machines (heading 84.22), household washing machines (heading 84.50), roller or other ironing machines (heading 84.20 or 84.51), sewing machines (heading 84.52), electric scissors (heading 84.67) or to electro-thermic appliances (heading 85.16).
5. For the purposes of heading 85.23 :
 - a. "Solid-state non-volatile storage devices" (for example, "flash memory cards" or "flash electronic storage cards") are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, "FLASH E²PROM") in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;
 - b. The term "smart cards" means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.
6. For the purposes of heading 85.34 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).
The expression "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.
Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 85.42.
7. For the purpose of heading 85.36, "connectors for optical fibres, optical fibre bundles or cables" means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.
8. Heading 85.37 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 85.43).
9. For the purposes of headings 85.41 and 85.42 :
 - a. "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;
 - b. "Electronic integrated circuits" are :
 1. Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, indium phosphide) and are inseparably associated;
 2. Hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semi-conductor technology, are combined to all intents and purposes indivisibly, by interconnections or interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components.
 3. Multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without leadframes, but with no other active or passive circuit elements.
 4. Multi-component integrated circuits (MCOs) : a combination of one or more monolithic, hybrid, or multi-chip integrated circuits with at least one of the following components : silicon-based sensors, actuators, oscillators, resonators or combinations thereof, or components performing the functions of articles classifiable under heading 85.32, 85.33, 85.41,

or inductors classifiable under heading 85.04, formed to all intents and purposes indivisibly into a single body like an integrated circuit, as a component of a kind used for assembly onto a printed circuit board (PCB) or other carrier, through the connecting of pins, leads, balls, lands, bumps, or pads.

For the purpose of this definition:

1. "Components" may be discrete, manufactured independently then assembled onto the rest of the MCO, or integrated into other components.
2. "Silicon based" means built on a silicon substrate, or made of silicon materials, or manufactured onto integrated circuit die.
3. a. "Silicon based sensors" consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of detecting physical or chemical quantities and transducing these into electric signals, caused by resulting variations in electric properties or displacement of a mechanical structure. "Physical or chemical quantities" relates to real world phenomena, such as pressure, acoustic waves, acceleration, vibration, movement, orientation, strain, magnetic field strength, electric field strength, light, radioactivity, humidity, flow, chemicals concentration, etc.
- b. "Silicon based actuators" consist of microelectronic and mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of converting electrical signals into physical movement

- c. "Silicon based resonators" are components that consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures in response to an external input.
- d. "Silicon based oscillators" are active components that consist of microelectronic or mechanical structures that are created in the mass or on the surface of a semiconductor and that have the function of generating a mechanical or electrical oscillation of a predefined frequency that depends on the physical geometry of these structures."

For the classification of the articles defined in this Note, headings 85.41 and 85.42 shall take precedence over any other heading in the Nomenclature, except in the case of heading 85.23, which might cover them by reference to, in particular, their function.

10. For the purposes of heading 85.48, "spent primary cells, spent primary batteries and spent electric accumulators" are those which are neither usable as such because of breakage, cutting-up, wear or other reasons, nor capable of being recharged.

Subheading Note.

1. Subheading 85.27.1200 covers only cassette-players with built-in amplifier, without built-in loudspeaker, capable of operating without an external source of electric power and the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

 - c. All other parts and accessories are to be classified in heading 90.33.
3. The provisions of Notes 3 and 4 to Section XVI apply also to this Chapter.
4. Heading 90.05 does not apply to telescopic sights for fitting to arms, periscopic telescopes for fitting to submarines or tanks, or to telescopes for machines, appliances, instruments or apparatus of this Chapter or Section XVI; such telescopic sights and telescopes are to be classified in heading 90.13.
5. Measuring or checking optical instruments, appliances or machines which, but for this Note, could be classified both in heading 90.13 and in heading 90.31 are to be classified in heading 90.31.
6. For the purposes of heading 90.21, the expression "orthopaedic appliances" means appliances for :
 - Preventing or correcting bodily deformities; or
 - Supporting or holding parts of the body following an illness, operation or injury.
 Orthopaedic appliances include footwear and special insoles designed to correct orthopaedic conditions, provided that they are either (1) made to measure or (2) mass-produced, presented singly and not in pairs and designed to fit either foot equally.

7. Heading 90.32 applies only to :
- Instruments and apparatus for automatically controlling the flow, level, pressure or other variables of liquids or gases, or for automatically controlling temperature, whether or not their operation depends on an electrical phenomenon which varies according to the factor to be automatically controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically its actual value; and
 - Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilised against disturbances, by constantly or periodically measuring its actual value.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes.

1. This Chapter does not cover :
 - a. Clocks or watch glasses or weights (classified according to their constituent material);
 - b. Watch chains (heading 71.13 or 71.17, as the case may be);
 - c. Parts of general use defined in Note 2 to Section XV, of base metal (Section XV), or similar goods of plastics (Chapter 39) or of precious metal or metal clad with precious metal (generally heading 71.15); clock or watch springs are, however, to be classified as clock or watch parts (heading 91.14);
 - d. Bearing balls (heading 73.26 or 84.82, as the case may be);
 - e. Articles of heading 84.12 constructed to work without an escapement;
 - f. Ball bearings (heading 84.82); or
 - g. Articles of Chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (Chapter 85).
2. Heading 91.01 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semi-precious stones (natural, synthetic or reconstructed) of headings 71.01 to 71.04. Watches with case of base metal inlaid with precious metal fall in heading 91.02.
3. For the purposes of this Chapter, the expression "watch movements" means devices regulated by a balance-wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.
4. Except as provided in Note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this Chapter.
